# ЖУРНАЛ КАРДИОРЕСПИРАТОРНЫХ ИССЛЕДОВАНИЙ

№2 (2020) DOI <http://dx.doi.org/10.26739/2181-0974-2020-2>

## Главный редактор:

### Ташкенбаева Элеонора Негматовна

доктор медицинских наук, заведующая кафедрой внутренних болезней №2 Самарканского Государственного Медицинского института, председатель Ассоциации терапевтов Самаркандской области. <https://orcid.org/0000-0001-5705-4972>

## Заместитель главного редактора:

### Хайбулина Зарина Руслановна

доктор медицинских наук, руководитель отдела биохимии с группой микробиологии ГУ «РСНПМЦХ им. акад. В. Вахидова»  
<https://orcid.org/0000-0002-9942-2910>

## ЧЛЕНЫ РЕДАКЦИОННОЙ КОЛЛЕГИИ:

### Аляви Анис Лютфуллаевич

академик АН РУз, доктор медицинских наук, профессор, руководитель Республиканского специализированного научно-практического медицинского центра терапии и медицинской реабилитации, Председатель Ассоциации Терапевтов Узбекистана (Ташкент)  
<https://orcid.org/0000-0002-0933-4993>

### Бокерия Лео Антонович

академик РАН и РАМН, доктор медицинских наук, профессор, Президент научного центра сердечно-сосудистой хирургии им. А.Н. Бакулева (Москва)  
<https://orcid.org/0000-0002-6180-2619>

### Курбанов Равшанбек Давлатович

академик АН РУз, доктор медицинских наук, профессор, директор Республиканского специализированного научно-практического медицинского центра кардиологии, Председатель Ассоциации Кардиологов Узбекистана (Ташкент)  
<https://orcid.org/0000-0001-7309-2071>

### Michał Tendera

профессор кафедры кардиологии Верхнесилезского кардиологического центра, Силезский медицинский университет в Катовице, Польша (Польша)  
<https://orcid.org/0000-0002-0812-6113>

### Покушалов Евгений Анатольевич

доктор медицинских наук, профессор, заместитель генерального директора по науке и развитию сети клиник «Центр новых медицинских технологий» (ЦНМТ), советник председателя Сибирского Отделения РАН (Новосибирск),  
<https://orcid.org/0000-0002-2560-5167>

### Акилов Хабибулла Атауллаевич

доктор медицинских наук, профессор, ректор Ташкентского Института Усовершенствования Врачей (Ташкент)

### Ризаев Жасур Алимжанович

доктор медицинских наук, профессор, Ректор Самарканского государственного медицинского института  
<https://orcid.org/0000-0001-5468-9403>

### Зиядуллаев Шухрат Худойбердиевич

доктор медицинских наук, доцент, проректор по научной работе и инновациям Самарканского Государственного медицинского института  
<https://orcid.org/0000-0002-9309-3933>

### Зуфаров Миржамол Мирумарович

доктор медицинских наук, профессор, руководитель отдела ГУ «РСНПМЦХ им. акад. В. Вахидова»  
<https://orcid.org/0000-0003-4822-3193>

### Ливерко Ирина Владимировна

доктор медицинских наук, профессор, заместитель директора по науке Республиканского специализированного научно-практического медицинского центра фтизиатрии и пульмонологии Республики Узбекистан (Ташкент)  
<https://orcid.org/0000-0003-0059-9183>

### Цурко Владимир Викторович

Доктор медицинских наук, профессор кафедры общей врачебной практики Института профессионального образования Первого Московского государственного медицинского университета им. И.М. Сеченова (Семёновский университет) (Москва)  
<https://orcid.org/0000-0001-8040-3704>

### Тураев Феруз Фатхуллаевич

доктор медицинских наук, главный научный сотрудник отделения приобретенных пороков сердца ГУ «РСНПМЦХ им. акад. В. Вахидова»

### Насирова Зарина Акбаровна

ассистент кафедры внутренних болезней №2 Самарканского Государственного Медицинского Института (ответственный секретарь)

**Bosh muharrir:**

**Tashkenbayeva Eleonora Negmatovna**  
*tibbiyot fanlari doktori, Samarqand davlat tibbiyot instituti 2-sonli ichki kasalliklar kafedrasi mudiri, Samarqand viloyati vrachlar uyushmasi raisi.*  
<https://orsid.org/0000-0001-5705-4972>

**Bosh muharrir o'rinnbosarlari:**

**Xaibulina Zarina Ruslanovna**  
*tibbiyot fanlari doktori, "akad V. Vohidov nomidagi RIJM davlat institutining mikrobiologiya guruhi bilan biokimyo kafedrasi mudiri"*  
<https://orcid.org/0000-0002-9942-2910>

**TAHRIRIYAT A'ZOLARI:**

**Alyavi Anis Lyutfullayevich**

*O'zbekiston Respublikasi Fanlar akademiyasining akademigi, tibbiyot fanlari doktori, professor, Respublika ixtisoslashtirilgan tibbiy terapiya va reabilitatsiya ilmiy-amaliy markazining boshlig'i, O'zbekiston Terapevtlar uyushmasi raisi (Toshkent),*  
<https://orcid.org/0000-0002-0933-4993>

**Bockeria Leo Antonovich**

*Rossiya fanlar akademiyasining akademigi, tibbiyot fanlari doktori, professor, A.N. Bakuleva nomidagi yurak-qon tomir jarrohligi ilmiy markazi prezidenti (Moskva)*  
<https://orcid.org/0000-0002-6180-2619>

**Qurbanov Ravshanbek Davlatovich**

*O'zbekiston Respublikasi Fanlar akademiyasining akademigi, tibbiyot fanlari doktori, professor, Respublika ixtisoslashtirilgan kardiologiya ilmiy-amaliy tibbiyot markazining direktori, O'zbekiston Kardiologlar uyushmasi raisi (Toshkent)*  
<https://orcid.org/0000-0001-7309-2071>

**Mixal Tendera**

*Katovitsadagi Sileziya Tibbiyot Universiteti, Yuqori Sileziya Kardiologiya Markazi kardiologiya kafedrasi professori (Polsha)*  
<https://orcid.org/0000-0002-0812-6113>

**Pokushalov Evgeniy Anatolevich**

*tibbiyot fanlari doktori, professor, "Yangi tibbiy texnologiyalar markazi" (YTTM) klinik tarmog'ining ilmiy ishlari va rivojlanish bo'yicha bosh direktorining o'rinnbosari, Rossiya Fanlar akademiyasining Sibir filiali raisining maslahatchisi (Novosibirsk)*  
<https://orcid.org/0000-0002-2560-5167>

**Akilov Xabibulla Ataullayevich**

*tibbiyot fanlari doktori, professor, Toshkent vrachlar malakasini oshirish instituti rektori (Toshkent)*

**Rizayev Jasur Alimjanovich**

*tibbiyot fanlari doktori, professor, Samarqand davlat tibbiyot instituti rektori*  
<https://orcid.org/0000-0001-5468-9403>

**Ziyadullayev Shuxrat Xudoyberdiyevich**

*tibbiyot fanlari doktori, dotsent, Samarqand davlat tibbiyot institutining fan va innovatsiyalar bo'yicha prorektori (Samarqand)*  
<https://orcid.org/0000-0002-9309-3933>

**Zufarov Mirjamol Mirumarovich**

*tibbiyot fanlari doktori, professor, "akad V. Vohidov nomidagi RIJM davlat muassasasi" bo'limi boshlig'i*  
<https://orcid.org/0000-0003-4822-3193>

**Liverko Irina Vladimirovna**

*tibbiyot fanlari doktori, professor, Respublika ixtisoslashtirilgan fitiologiya va pulmonologiya ilmiy-amaliy tibbiyot markazining ilmiy ishlari bo'yicha direktor o'rinnbosari (Toshkent)*  
<https://orcid.org/0000-0003-0059-9183>

**Surko Vladimir Viktorovich**

*I.M. Sechenov nomidagi Birinchi Moskva Davlat Tibbiyot Universiteti Kasbiy ta'lim institutining umumiy amaliyot shifokorlik amaliyoti kafedrasi tibbiyot fanlar doktori, professori (Semyonov universiteti) (Moskva)*  
<https://orcid.org/0000-0001-8040-3704>

**To'rayev Feruz Fatxullayevich**

*tibbiyot fanlari doktori, "akad V. Vohidov nomidagi RIJM davlat institutining yurak kasalliklari" bo'limining bosh ilmiy xodimi*  
<https://orcid.org/0000-0002-1321-4732>

## ADABIYOTLAR TAHLILI | REVIEW ARTICLES | ОБЗОРНЫЕ СТАТЬИ

### 1. Agababyan I.R. Ziyadullayev Sh.X. Ismoilov J.A.

Arterial gipertenziya va komorbid holat

Артериальная гипертония и коморбидное состояние

Arterial hypertension and comorbid state.....9

### 2. Axmedov Ya. A.

Bolalardagi yurak va katta tomirlarning nurlı diagnostika asoslari

Основы лучевой диагностики сердца и крупных сосудов у детей

Basics of radiation diagnostics of heart and large vessels in children.....14

### 3. Ziyadullaev Sh.X., Xatamov X.M., Aripova T.U., Suyarov A.A., Kireev V.V., Mutalov B.B.

Bronxial astmani davolashda zamonaviy tadqiqotlar va muvaffaqiyatga erishish istiqbollari

Перспективы современных исследований и успехи в лечении бронхиальной астмы

Prospects of modern research and progress in the treatment of bronchial asthma.....20

### 4. Kadirova F.Sh., Raximova M.E., Tashkenbayeva E.N.

Saqlangan va oraliq chap qorincha chiqarish fraktsiyasi bilan surunkali yurak yetishmovchiligi, uni korreksiya usullari

Хроническая сердечная недостаточность с сохранённой и промежуточной фракцией выброса левого желудочка, пути её коррекции

Chronic heart failure with preserved and intermediate left ventricular ejection fraction, ways of its correction.....28

### 5. To'raev F.F., Maqsudov M.F.

Miokard va koronar arteriyalardagi morfo-funksional o'zgarishlar diagnostikasida zamonaviy tasvirlash usullari

Современные методы визуализации в диагностике морфо-функциональных изменений миокарда и коронарных артерий

Modern imaging methods in the diagnosis of morpho-functional changes in the myocardium and coronary arteries.....35

## ORIGINAL MAQOLALAR | ОРИГИНАЛЬНЫЕ СТАТЬИ | ORIGINAL ARTICLES

### 6. Ganiev A.G., Nazarov K.D.

Andijon viloyati bo'yicha bolalarda bronxial astma kassaligini og'ir formasining xarakteristikasi

Характеристика тяжелых форм бронхиальной астмы у детей Андижанской области

Characteristics of severe forms of bronchial asthma in children of the Andijan region.....47

### 7. Makhmatmuradova N.N. Ibadova O.A. Zikriyaeva P.A.

Nospetsifik interstitial pnevmoniyanı differentsial diagnostikasi

Дифференциальная диагностика неспецифической интерстициальной пневмонии

Differential diagnostics of non-specific interstitial pneumonia.....50

### 8.Mustafakulov I.B., Tagaev K.R., Umedov X.A.

Termoingaliyatsion shikastlangan bemorlarni davolash bo'yicha bizning tajribamiz

Наш опыт лечения больных термоингаационной травмой

Our experience in the treatment of patients with thermoingal injury.....53

<b>9. Oqboev T. A.</b>	
Oilaviy bronxial astma bilan xastalangan bemorlar oilasidagi shaxslar o`rtasida hamroh allergik kasalliklarni uchrashi.	
Случаи сочетания с аллергическими заболеваниями среди семей с семейной бронхиальной астмой.	
In combination with allergic diseases among families with bronchial asthma.....	59
<b>10. Raxmetova M.R.</b>	
Qandli diabet kasalligi bilan og`rigan bemorlarda yurak-qon tomir asoratlari rivojlanishining xavf omillari ta'siri	
Факторы, влияющие на развитие кардиоваскулярных осложнений у больных сахарным диабетом	
Influence of risk factors on the development of cardiovascular complications in patients with diabetes mellitus.....	62
<b>11. Saidova M. A.</b>	
O`pka tuberkulyozining yurak-qon tomir kasalliklari bilan birga kechish muammolari	
К вопросу течения легочного туберкулеза с заболеваниями сердечно-сосудистой системы	
To the question of the course of pulmonary tuberculosis with diseases of the cardiovascular system.....	66
<b>12. Sadikova Sh.N. Shodikulova G.Z.</b>	
Q tishchali va Q tishchasisiz miokard infarktida bemorlarda klinik- asbobiy ko`rsatkichlarning xususiyati	
Особенности клинико-инструментальных показателей у больных с инфарктом миокарда без зубца Q и с зубцом Q	
Features of clinical and instrumental indicators in patients with myocardial infarction without Q wave and Q wave.....	70

### ANNOTATION

To study the characteristics of severe bronchial asthma, 140 children were examined. A survey, clinical, allergological and functional examinations were carried out. Studies have shown that in boys, asthma becomes severe earlier. Polyvalent sensitization to epidermal allergens and the presence of bronchial asthma in the mother of the child, severe asphyxia at birth are risk factors for severe asthma in children.

**Keywords:** severe bronchial asthma, children.

### ХАРАКТЕРИСТИКА ТЯЖЕЛЫХ ФОРМ БРОНХИАЛЬНОЙ АСТМЫ У ДЕТЕЙ АНДИЖАНСКОЙ ОБЛАСТИ

### АННОТАЦИЯ

Для изучения характеристик тяжелой бронхиальной астмы было обследовано 140 детей. Был проведен опрос, клинические, аллергологические и функциональные обследования. Исследования показали, что у мальчиков астма в более ранние сроки становится тяжелой. Поливалентная сенсибилизация к эпидермальным аллергенам и наличие бронхиальной астмы у матери ребенка, тяжелая асфиксия при рождении являются факторами риска тяжелого течения астмы у детей.

**Ключевые слова:** тяжелая бронхиальная астма, дети.

### ANDIJON VILOYATI BO'YICHA BOLALARDA BRONXIAL ASTMA KASALLIGI OG'IR FORMASINING XARAKTERISTIKASI

### ANNOTATSIYA

Og'ir kechuvchi bronxial astma xususiyatlarini o'rGANISH uchun 140 bola tekshirildi. Klinik, allergologik va funktsional tekshiruvlari o'tkazildi. Tadqiqotlar shuni ko'rsatdiki, erta yoshidagi bolalarda astma borligi kasallikni kechishi og'irlashtiradi, epidermal allergenlarga sezuvchanlik oshadi. Bolaning onasida astma borligi, bola uchun xavfli omil bo'lib, tug'ilishda og'ir asfiksiyaga olib kelishi mumkin.

**Kalit so'zlar:** og'ir bronxial astma, bolalar.

The problem of asthma continues to be relevant throughout the world, despite numerous studies and a sufficient amount of treatment and preventive measures. In childhood, asthma is one of the most common chronic diseases [1,2,3,16].

According to the results of a number of researchers, the prevalence of asthma in the Republic of Uzbekistan varies from 1.1% to 8.2%, which is due not only to the influence of external regional factors, but also to the use of various diagnostic methods [4,7,6,11]. However, as shown by almost all studies conducted under the ISAAC (International Study of Asthma and Allergy in Children) program in all regions of the planet, the true incidence of asthma was significantly higher than official statistics [7,9,10,13]. According to the results of a number of researchers, the prevalence of asthma in the Republic of Uzbekistan varies from 3.1% to 8.2%, which is due not only to the influence of external regional factors, but also to the use of various diagnostic methods [4,5,6]. However, as shown by almost all studies conducted under the ISAAC (International Study of Asthma and Allergy in Children) program in all regions of the planet, the true incidence of asthma was significantly higher than official statistics [1,7,17]. The discrepancies between official statistics on employment and the results of epidemiological studies are also associated with the under diagnosis of bronchial asthma in different age groups.

Analysis of epidemiological studies in the city of Andijan showed that in the structure of the prevalence of allergic diseases, bronchial asthma is in 2nd place (5.6 + 0.03%), yielding to allergic rhinitis (12.7 + 0.19%) [3,8,15].

Despite the use of increasingly effective means for anti-inflammatory therapy of respiratory allergies, up to a third of patients continue to complain about the persistence of symptoms of the disease even when it is carried out in an adequate age dosage.

Unfortunately, treatment with inhaled corticosteroids, being the most effective currently used, has a number of side effects, including depression of the axis of the hypothalamus-pituitary-adrenal cortex, the formation of local candidiasis and others [2,9,10,16].

The discrepancies between official statistics on employment and the results of epidemiological studies are also associated with the under diagnosis of bronchial asthma in different age groups [17]. These data determine the high urgency of the problem, explain the need and significance of research on the problem of severe asthma in children [2,11].

**Objective:** to study the characteristics of severe asthma in children of the Andijan region **Materials and methods.** A survey of 60 children from 2 to 17 years old, living on the territory of the Andijan region. The average age of the patients was  $8.5 \pm 1.9$  g. The average duration of asthma was 3.5 g. All children were divided into two groups: the first group consisted of boys with severe asthma ( $n = 49$ , 70%), the second is girls with severe BA ( $n = 21$ , 30%). As a comparison group, in the analysis of some indicators, children with moderate asthma — 25 people — appeared (the average age of the group was  $8.2 \pm 1.7$  g, the average duration of asthma was 5.2 g). The average age of boys with severe BA (group 1) was  $7.7 \pm 2.1$  g., The average age of girls with severe asthma (group 2) was  $8.9 \pm 3.8$  g. The

average duration of the disease course in boys it was 5.2 years old, for girls is 5.8 years old. The diagnosis of asthma in all patients was confirmed by the data of the disease history, clinical, allergic and functional examination. Allergological examination, in addition to a detailed history, included skin tests and determination of whey level of total IgE by ELISA. The statistical processing of the material was carried out in Excel (group average and its standard deviation, criterion X2 and student's criterion).

**Results and discussion.** The average age of patients at the time of setting diagnosis in boys was  $3.6 \pm 0.7$  g., in girls is  $4.8 \pm 1.6$  g. ( $p > 0.05$ ). In 85.7% of children, until obstruction of asthma was established, obstructive bronchitis was observed. The average age of onset of asthma, based on the fixation of the first symptoms of obstruction, was  $1.8 \pm 0.3$  g in boys, and in girls  $2.8 \pm 1.0$  g. The time between the appearance of the first symptoms and the establishment of the diagnosis was insignificantly different and amounted to  $2.0 \pm 0.4$  g., in boys and  $2.3 \pm 0.7$  g., in girls. Most boys (67.3%) and girls (76.2%) were immediately diagnosed with severe asthma, others had asthma as mild and moderate, and then became severe. On average, from the time of the diagnosis of BA to the establishment of a severe course of the disease, 3.8 g passed. in examined children. Most areas of the Andijan region are industrial. It is suggested that the adverse role of the external environment in the formation of the severe course of asthma plays a leading role [1,13]. In addition, among children living in ecologically unfavorable areas since birth, the number of patients with severe asthma increases compared with children who arrived in an ecologically unfavorable area after 3 years of age [5]. Confirmation of these facts obtained in our study. The largest number of children with severe asthma (32.9%) are in the age group of 3-6 years (Fig. 1). Moreover, this distribution, mainly due to the boys - 38.8% of boys from the severe BA group are in the age group of 3-6 years. Whereas the majority (28.6%) of girls are in the age group of 9-12 years old. The predominance of the age range of 3-6 years in the group of severe asthma in boys is due to the fact that the boys' lungs are late in structure development in early childhood compared with the lungs in girls. The male sex in this age period is associated with large lung volumes, but with proportionally narrow bronchs. When analyzing the age of onset of the first asthma symptoms, it was found that in 91.8% of boys the symptoms of the disease are found under the age of 3 years, against 66.7% of girls of the same age ( $p < 0.05$ ). Which is probably also associated with the anatomical features of the bronchs in boys. In hypoxia (a score of 7 or less on the Apgar scale) 54.3% of children with severe asthma were born, which is comparable with the comparison group is 59.1%.

Mechanical ventilation of the lungs (ALV) at birth lasting more than 5 days was found in 5.7% of children with severe asthma and ranged from 10 days to 2 months. In the comparison group, mechanical ventilation was not performed at birth for more than 5 days ( $p < 0.05$ ). A history of pneumonia was more common in girls — 27.4% versus 17.1% in boys ( $p > 0.05$ ). Allergic rhinitis (AR) and food intolerance were insignificantly more common in boys (90.8% versus 74.8% for AR and 25.5% versus 15.3% for food allergies). Atopic dermatitis (AD) in severe asthma in boys was found in 47.9% of cases, whereas in girls only in 18% of cases ( $p < 0.05$ ).

Table 1

#### Sensitization spectrum in children with asthma of severe and moderate course

Allergen	Children with severe BA, %	Children with moderate BA, %	Level of significance
Pollen Allergens	60,0	48,1	$p > 0,05$
Epidermal Allergens	68,6	46,2	$p < 0,05$

Household allergens	71,4	76,9	p>0,05
Cat hair	57,1	42,3	p>0,05
The coat of dogs	37,1	19,2	p>0,05
D. farine	31,4	55,8	P<0,05
D. Pteronissinus	37,1	63,5	P<0,05
Polyvalent Sensitization	77,8	48,1	P<0,05

The combination of AR and BP was significantly more common among boys (36.7%) with severe asthma than among girls — 14.9, (p <0.05). A diverse allergic pathology among the relatives of patients with severe BA was found in 59%. Allergic diseases in mothers of children with severe asthma were observed in 22.9%, against 12.5% in the comparison group, p> 0.05. BA in mothers of children with severe asthma occurred in 8.6% of cases, whereas in the comparison group this indicator was 1.1%, (p <0.05). The results obtained in the analysis of the spectrum of sensitization in severe BA in children are presented in tab. one. The table shows that in severe asthma sensitization to epidermal allergens (cat's fur, dog's and rabbit's fur) is significantly more common. Polyvalent sensitization

occurred with a greater frequency and is also more common in children from the group of severe asthma. This fact is consistent with the studies of L.M. Ogorodovoy, who established that multivalent sensitization is a risk factor for severe BA [4]. Sensitization to house dust mites, in contrast, was significantly more common in the comparison group. Thus, it is characteristic of severe asthma: a large percentage of sensitization among children to domestic, epidermal and pollen allergens. Sensitization to epidermal antigens, polyvalent sensitization, asthma in the mother of the child, mechanical ventilation for more than 5 days at birth are factors of severe asthma in children. In boys, asthma at an earlier date becomes severe.
